Coreque Documentation

Release 0

SheepDogInc.ca

May 01, 2017

Contents

A simple way to claim pull request *code reviews* as your own, and automate the inefficiency of finding relevant pull requests to review by sifting out projects you're not interested in, as well as taking responsibility / assigning a review to yourself.

Source code: Github

Note: We're currently in planning stages right now. We'll keep this up to date as things solidify. For the most up-to-date docs, check the README file.

Contents:

CHAPTER 1

Server API

GET `/repo/(repo_id)`
    List all pull requests for the repository with `repo_id`.

CHAPTER 2

Indices and tables

- genindex
- modindex
- search
